

Test With Confidence™

# Proven solutions for animal health and milk quality

# A proven partner for herd and flock health management and milk quality

No matter where they do business, food animal producers, processors, regulators and veterinarians have one need in common: proven solutions to help manage the health of herds and flocks and the quality of milk.

That's why IDEXX puts a premium on working with international veterinarians and researchers to develop innovative testing solutions. And why our scientists are involved in animal disease management strategies around the world.

We back up our top-quality tests with a team of dedicated IDEXX customer and technical support people who help veterinarians, producers, processors, researchers and technicians around the world. All so you can get the answers you need as quickly, confidently and cost-effectively as possible.
